Notes: Rates are calculated per 100,000 resident population. Non-resident cases were excluded when calculating rates. Cases with unknown county of residence were included when calculating total rates for Arizona. Streptococcus pneumoniae was only reportable by laboratories until Oct. 2004. Haemophilus influenzae type b includes all invasive H. influenzae type b, not just meningitis, and are age group specific rates. Meningococcal disease includes all invasive disease caused by Neisseria meningitidis, not just meningitis. Rates of invasive Streptococcus Group B in infants <90 days are per 1,000 live births. Animal rabies is not included.

The increase in the number of chlamydia and gonorrhea cases reported for 2005 was likely due to changes in surveillance and may not represent a true increase in incidence.

PID is Pelvic Inflammatory Disease. Resistant Gonorrhea includes PPNG, penicillinase producing Neisseria gonorrhoeae, a form of gonorrhea which destroys penicillin, and CHRNG, chromosomally mediated resistant Neisseria gonorrhoeae, a form of gonorrhea which is resistant to penicillin.
